SUMMARY

Computer Engineering recent graduate seeking an **Associate Software Engineer** role with a strong foundation in building scalable, end-to-end web applications with modern frontend and backend technologies. Experienced in integrating AI/ML models into backend services and deploying production ready solutions using cloud infrastructure and CI/CD pipelines. Highly motivated to contribute to real-world development environments and deliver reliable and scalable software solutions.

WORK EXPERIENCE

Software Engineering Intern - HashBaze (Pvt) Ltd

July 2024– Feb 2025

- Built and deployed scalable full-stack applications using React.js, Next.js (SSR), Node.js, NestJS with RESTful APIs and GraphQL.
- Designed and optimized databases with MongoDB and PostgreSQL focusing on efficient schema design and query performance.
- Implemented DevOps and AI integrations using Docker, CI/CD (GitHub Actions) and AI/ML model integration within backend services.
- Tech Stack: React.js, Next.js, Node.js, NestJS, MongoDB, PostgreSQL, Docker, GitHub Actions, GraphQL, REST APIs, AWS

Full-Stack Developer (Part time) - Syneptic Labs (Pvt) Ltd

Dec 2023– May 2024

- Worked as a Full-Stack Developer, focusing on frontend and backend services for real world projects.
- Developed responsive web applications using React.js and Material UI, ensuring seamless user experience.
- Built backend services with Spring Boot and MySQL, implementing efficient APIs and data management.
- Collaborated cross functionally and managed project tasks effectively using Jira for tracking and team coordination
- Tech Stack: React.js, Material UI, Spring Boot, MySQL, Jira

EDUCATION

BSc.Eng (Hons) in Computer Engineering

2021 - 2025

Faculty of Engineering, University of Ruhuna

GCE Advanced Level Examination

2017 - 2019

H/Mahanaga National School, Hambantota

PROJECTS

SLUDI Digital Identity System | Final Year Project

Dec 2023- May 2024

- Developed a decentralized digital identity system using Hyperledger Fabric and IPFS enabling tamper-proof, secure storage of encrypted biometric data.
- Implemented AI-based biometric authentication, fine tuning ConvNeXt, ViT and EfficientNetB4 models to detect deepfakes and facial fraud.
- Designed secure online and offline authentication using QR-based challenge response protocols, RSA/SHA-256 cryptography with a Spring Boot backend, React.js web app and Flutter mobile wallet..
- Tech Stack: Java, Spring Boot, React.js, Flutter, Hyperledger Fabric, IPFS, PostgreSQL, Redis, Docker, GitHub Actions, Python, ConvNeXt, ViT, EfficientNetB4, AES-256, RSA, SHA-256

Hotel Booking System (E-commerce Microservices) | Full-Stack

Aug 2024– Sep 2024

- Designed and implemented a scalable microservices architecture, decomposing a monolith into Auth, Booking, Payment, Notification services with event-driven communication via RabbitMQ and Stripe payment integration.
- Built and deployed a secure API Gateway using Node.js and TypeScript, implementing JWT authentication, RBAC and containerized deployment with Docker & Kubernetes, including automated health checks.
- Tech Stack: Node.js, TypeScript, React.js, MongoDB, RabbitMQ, Docker, Kubernetes, Stripe

Virtual Travel Assistant Platform | Full-Stack Web Application

Jan 2024– May 2024

- Designed and implemented a full-stack tourism platform with Spring Boot backend and React.js frontend.
- Developed scalable RESTful APIs and optimized MongoDB aggregations for efficient data retrieval.
- Applied Redux for state management and built comprehensive end to end testing with Cypress.
- Tech Stack: Java, Spring Boot, React.js, MongoDB, Docker, Cypress, Redux

InternLK Mobile Application | Android Developmet

Dec 2023– Feb 2024

- Developed a native Android app using Kotlin with MVVM architecture and real time features via Firebase.
- Designed a modern and accessible UI using Jetpack components, optimized for multiple device form factors.
- Integrated Firebase Authentication and Cloud Firestore for secure and scalable user management.
- Tech Stack: Kotlin, Android, Firebase, Git

SKILLS

Agentic AI & Generative AI: LangChain, Vector Embeddings, LLM Integration

Machine Learning & Deep Learning: scikit-learn, TensorFlow, PyTorch, AI Model Training

Computer Vision & NLP: OpenCV, HuggingFace Transformers

Full-Stack: React.js, Next.js, Node.js, NestJS, Express.js, FastAPI, Spring Boot, Tailwind CSS, Material UI

Databases & Caching: MongoDB, MySQL, PostgreSQL, Vector DBs, Redis

Cloud & DevOps: AWS, Docker, GitHub Actions, Nginx, Cloudflare, Azure DevOps

APIs & Tools: REST, GraphQL, CI/CD

Programming Languages: Python, Java, JavaScript, TypeScript, SQL, Kotlin

Project Management Tools: Jira, ClickUp

Soft Skills: Leadership, Problem Solving, Communication, Teamwork, Time Management

CERTIFICATIONS

Spring Boot 4 (Spring Core, Spring REST, Spring Security, JPA, Hibernate)– Udemy

Supervised Machine Learning (Regression and Classification) – Coursera

Multicloud Network Associate - Aviatrix

Fundamentals of Cybersecurity - Fortinet

EXTRA-CURRICULAR ACTIVITIES

Organizing Committee Member - Xbotics Robotics Competition

Electrical and Information Engineering Society, University of Ruhuna (2025)

Participation - HaXtream 2.0 Coding Competition

IEEE Student Branch, University of Ruhuna (2023)

Participation - Xbotics Robotics Competition

Electrical and Information Engineering Society, University of Ruhuna (2025)
